

Academy Sports Floor

The Academy system is a cost effective solution which we would recommend for installations where under floor heating is to be installed or where the sub-floor is uneven.

London Sports Floor

The London sports floor system accommodates a choice of synthetic surfaces, using elastic beams that can be levelled thus removing the need for a levelling floor screed, simplifying installation and reducing overall cost.

Sports Flooring Service Line Marking

Helsinki Sports Floor

Using the same elastic layer system as Athen, our Helsinki sports floor gives the same ideal consistency of ball bounce, and is finished with a hardwood wear layer.

Athen Sports Floor

The Athen sports floor is our flagship area elastic sprung sports floor, with consistent ball bounce across the floor and accommodates a wide range of synthetic playing surfaces.

PU Sports Floor

A polyurethane sports floor has a seamless construction. That means there are no joins to fail in later years. Polyurethane can be repaired seamlessly.

SPORTS LINE PAINTING AND COURT MARKING

Sports floors must be line marked to strict dimensions with line widths +/-2mm and overall dimensions within 0.1% of Sport England guidelines. Failure to comply could result in your venue being unable to host future tournaments, so you can't afford to get it wrong!

No matter what the primary use of your sports floor is, the line marking will be subject to heavy wear. For this reason we don't recommend taped lines as it's very easy for tape to pull loose. In the long term, professionally painted lines and court markings will prove a more durable and reliable option at a lower cost.

We use a two-part polyurethane paint which typically gives a 5-7 year life span between re-marking, compared with a typical 3-5 life span for water-based paint.

The Sports Line Marking Drawing

We prepare a line marking drawing as part of every new project. We are also happy to provide this for existing installations since court marking guidelines do change, such as the recent change to the basketball keys.

Drawings are prepared to the very latest revisions and standards to assist in important details including fixing positions, apparatus covers and required floor run-offs.

The design layout of individual court markings needs to be considered carefully to avoid line markings clashing or being too close.

Individual Sports

Colours for individual sports are typically:

Sport	Colour	Width
Badminton	White	40mm
Basketball	Black	50mm
Hockey	Blue	50mm
Netball	Red	50mm
Tennis	Yellow	50mm
Volleyball	Green	50mm
5 a-side	Other	80mm

(We recommend 50mm in a multi use sports hall)

Flooring Surfaces, Accessories & Services

New Regulation Court Markings

If you require revised court markings to meet new regulations, such as those for Basketball, we offer solutions ranging from localised cleaning and painting of the specific area that we will be applying the new lines, to a complete sand and re-seal (wood floors only) to restore your entire floor to its new condition with a complete set of new lines.

If we are revising the line marking we will be 'painting out' the old markings as necessary. We would work with you to choose a colour that closely matches your existing floor whatever the surface type. If it's not invisible it will be a very good match.

Bespoke Court Painting

Alongside line marking, we offer bespoke court painting such as marking a border around the principal court, infilling the keys or centre circle on your court and hand painting a school or club logo onto your floor to completely transform and personalise your court.

Sports Floor Maintenance

Unfortunately no sports floor is maintenance free. As well as providing detailed care and maintenance instructions we also offer services to help preserve or rejuvenate your sports floors including, scrub and reseals, sand and re-seal, chemical cleans, re-line marking and surface repairs. Good maintenance is not only vital to maintaining the performance of your floor but also for lowering the risk of injury to athletes and it preserves your 25 year warranty.

Floor protection

In order to maintain your sports floor characteristics and prolong its life, a surface protection should be considered. We offer two solutions including durable vinyl protection and resilient carpet tiles to protect your sports floor through prolonged periods of non-sporting activities.
