

Academy Sports Floor

The Academy system is a cost effective solution which we would recommend for installations where under floor heating is to be installed or where the sub-floor is uneven.

London Sports Floor

The London sports floor system accommodates a choice of synthetic surfaces, using elastic beams that can be levelled thus removing the need for a levelling floor screed, simplifying installation and reducing overall cost.

Helsinki Sports Floor

Using the same elastic layer system as Athen, our Helsinki sports floor gives the same ideal consistency of ball bounce, and is finished with a hardwood wear layer.

Athen Sports Floor

The Athen sports floor is our flagship area elastic sprung sports floor, with consistent ball bounce across the floor and accommodates a wide range of synthetic playing surfaces.

PU Sports Floor

A polyurethane sports floor has a seamless construction. That means there are no joins to fail in later years. Polyurethane can be repaired seamlessly.

FLOOR PROTECTION

Rarely is a sports hall used purely for sport. Typically they accommodate a wide range of both sporting and non-sporting activities including exams, concerts and social events. If your sports hall is being used for non-sporting activities, a surface protection is essential to maintaining your sports floors playing characteristics and to prolong its life.

Without floor protection your sports floor could easily become scratched and damaged, not only causing the aesthetics of the floor to diminish but also its ongoing performance. For example, excessive footfall in non-sporting shoes during social events can quickly make the surface slippery, increasing the risk of injury to athletes, while tables and chairs during exam periods can damage the surface finish.

We offer two floor protection solutions:

Vinyl Protection

Our vinyl floor protection is ideal for laying over any sports floors to protect the surface from damage caused by tables, chairs or non-sporting shoes during social events. It not only protects your sports floor but also offers a highly durable anti-slip surface. The Vinyl protection is supplied on a roll for ease of use and storage. It is available in three sizes and in two colours, to suit your individual requirements.

Product Highlights

- Highly durable
- Easy to install and store
- Anti-slip upper surface
- Lightweight, space saving when stored
- Reusable, multiuse protection
- Available in three sizes 1.5m x 20m, 1.5m x 33m or 1.5m x 40m
- Available in green or a light grey

FLOOR PROTECTION

Carpet Tiles

Our carpet tiles offer a better looking solution to vinyl. At 5.2mm thick and lightweight our carpet tiles offer a heavy duty alternative protection for sports floors that undergo prolonged periods of non-sporting use. When combined with our storage trolley they can be installed quickly and easily with a 1,000m² floor taking less than one and a half hours to lay.

Product Highlights

- Highly durable
- Easy to install and store when combined with storage trolley
- Suitable for use with underfloor heating
- 2m x 1m per tile
- Available in three colours; blue, grey or brown
- Lightweight
- Better looking than vinyl

Sports Floor Maintenance

Unfortunately no sports floor is maintenance free. As well as providing detailed care and maintenance instructions, we offer services to help preserve or rejuvenate your sports floor including, scrub and reseal, sand and re-seal, chemical clean, re-line marking and surface repairs.

Good maintenance is not only vital to maintaining the performance of your floor but also to preserve your 25 year warranty.

Line Marking

Line marking is a vital component of your sports floor and will require periodic re-marking due to wear and tear. If your sports floor needs remarking, we offer solutions ranging from localised cleaning and painting to the specific area that we will be applying the new lines, to a complete sand and re-seal to restore your entire floor to its new condition with a complete set of new lines.
